

GETTING STARTED

Tabs will navigate the user through the entire process.

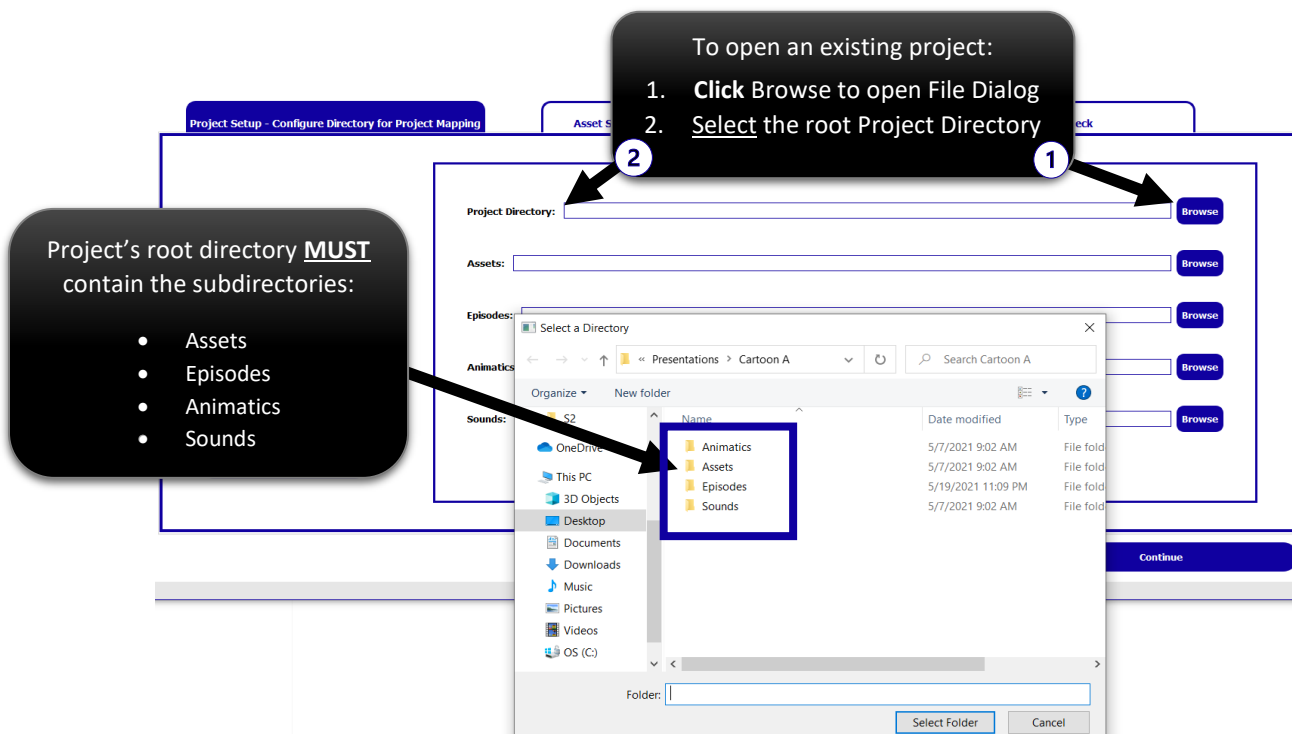

Setup mapping of Project directories to get started. Cannot continue to next step without configuring directories.

Continue navigates forward to next step. Back navigates to previous steps, for changes & error correction.

Each tab represents a step in the process. The steps entail Directory Configuration, CSV Selection & Asset Handling. Continue & Back buttons are used to navigate steps. Each step has requirements to be met before proceeding to the next step.

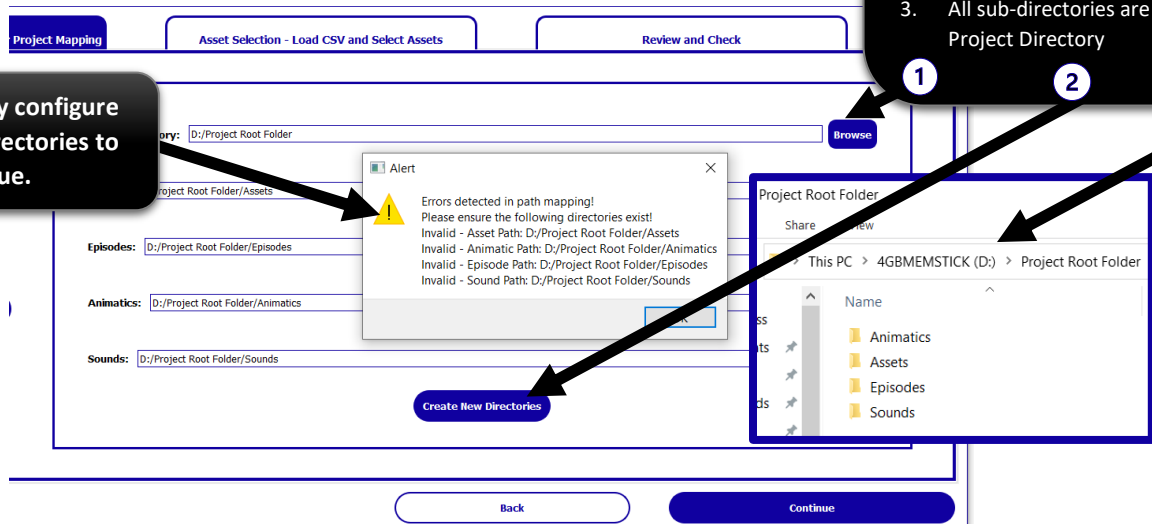

PROJECT DIRECTORY MAPPING & STRUCTURE

Open an existing project by clicking browse button and selecting the root project directory from the Open File dialogue. Project's root directory must contain the named subdirectories Assets, Episodes, Animatics & Sounds. To proceed to next step, directory and sub-directories **MUST** be configured.

CREATING NEW DIRECTORIES

MUST correctly configure mapping of directories to continue.

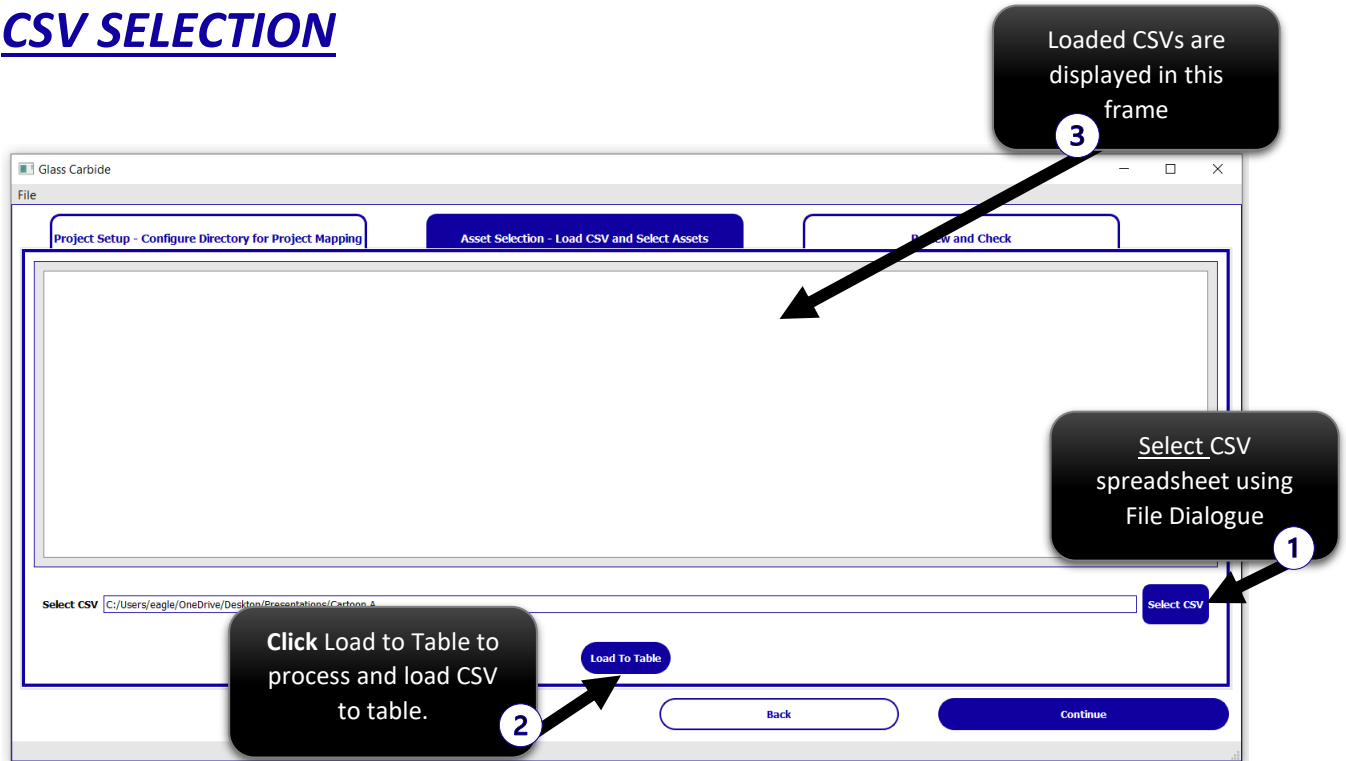

For new projects or missing select subfolders, new directories can be auto created.

1. Click Browse & Select root Project Directory
2. Click Create New Directories Button
3. All sub-directories are created in the Project Directory

Create a new project by clicking Browse button next to the Project Directory input. Use the File Dialogue to select the root Project Directory. Click Create New button and all subdirectories will be auto created. To proceed to next step, directory and sub-directories **MUST** be configured.

CSV SELECTION

This step entails loading CSV to the table and selecting rows and columns to proceed with. Click Select CSV button to open File Dialogue and select CSV of Assets. Click Load To Table button and CSV will be loaded in frame.

HEADER TAGS & ROW/COLUMN SELECTION

The screenshot shows the 'Asset Selection' window with a table of assets. Callout 1 points to the 'Select' column, indicating that rows should be selected using checkmarks. Callout 2 points to the 'Header' column, explaining that header tags must be added to columns to be selected. A third callout points to the 'Assets' column, stating that both the column and its header tag must be added to proceed.

1 Select rows with a check mark

2 Select column by adding a header tag. **None** tags will cause columns to be ignored. Header tags are added by:

- Select preset from drop-down list
- OR
- Double click header tag of selected column & input custom tag name

Asset & ShotCode header tags **MUST** be added to Asset column to proceed

Select	ID	Shot Code	Status	Thumbnail	Cut Duration	Description	Assets
<input type="checkbox"/>	33601	ep025seq01sh01	ip	http://...	61	None	no_c
<input checked="" type="checkbox"/>	33602	ep025seq01sh02	ip	http://...	74	Assets	no_c
<input checked="" type="checkbox"/>	33603	ep025seq01sh03	ip	http://...	85	ShotCode	no_c
<input checked="" type="checkbox"/>	33604	ep025seq01sh04	ip	http://...	92	Duration	no_c
<input checked="" type="checkbox"/>	33605	ep025seq01sh05	ip	http://...	92	Frames	no_c
<input checked="" type="checkbox"/>	33606	ep025seq01sh06	ip	http://...	87	Resolution	no_c
<input checked="" type="checkbox"/>	33607	ep025seq01sh07	ip	http://...	87	chars_crispy, props_candies_001, sets_home_010	no_c
<input type="checkbox"/>	33608	ep025seq01sh08	ip	http://...	87	chars_greg, props_book_001, sets_home_005b	no_c
<input type="checkbox"/>	33609	ep025seq01sh09	ip	http://...	87	chars_lex, chars_plu, props_book_001, props_candies_001, sets_home_001	no_c
<input type="checkbox"/>	33610	ep025seq01sh10	ip	http://...	87	sets_home_040	no_c
<input type="checkbox"/>	33611	ep025seq01sh11	ip	http://...	87	001, props_candies_001, sets_home_016	no_c
<input type="checkbox"/>	33612	ep025seq01sh12	ip	http://...	87	sets_home_090	no_c
<input type="checkbox"/>	33613	ep025seq01sh13	ip	http://...	87	chars_trisha, props_candies_001, props_mat_001, sets_home_021b	no_c
<input type="checkbox"/>	33614	ep025seq01sh14	ip	http://...	87	props_candies_001, sets_home_010	no_c
<input type="checkbox"/>	33615	ep025seq01sh15	ip	http://...	87	sets_home_pc_002b	no_c

Select rows by adding check mark. Columns are selected by adding a header tag. Add a header tag by selecting a preset from the drop-down list or double-click the header tag & manually input a custom tag name.

Columns with **None** header tags will be ignored and not selected to proceed to the next step. Columns & rows **MUST** be selected and Asset header tag **MUST** be added to asset column to proceed to next step.

PCLOUD PROCESSING & PUBLINKS

The screenshot shows the 'PCloud Processing' tab of the Glass Carbide software. It features three main panels: 'Assets' (top left), 'FileNames' (top right), and 'Publinks' (bottom left). The 'Assets' panel contains a table with columns 'ShotCode', 'Duration', and 'Assets'. The 'FileNames' panel contains a list of file names. The 'Publinks' panel contains a list of pCloud links. Annotations with arrows point to these panels and a 'pCloud Publink' input field.

Full listing of selected rows & columns shown here

Full list of selected files displayed here

Multiple PCloud Publinks can be added for simultaneous scanning. To add a Publink:

1. Input Publink & Click Add Link button
2. Added Publinks are displayed in Publinks list

ShotCode	Duration	Assets
ep025seq01sh01	61	sets_home_ext_008, CUSTOM FILENAME
ep025seq01sh02	74	chars_trisha, sets_home_090

Full listing of selected rows & columns is displayed on the left. List of selected assets is displayed on right. Add multiple publinks for scanning of assets by inputting pCloud link and click Add Link. Added publinks are displayed in publinks list on bottom left.

FILENAMES (PCLOUD)

The screenshot shows the 'PCLoud Processing' tab in the Glass Carbide software. The interface is divided into several sections:

- Project Setup - Configure Directory for Project Mapping**: This section contains a table with columns 'ShotCode', 'Duration', and 'Assets'. The 'Assets' column has a dropdown menu open, showing 'CUSTOM FILENAME'.
- Asset Selection - Load CSV and Select Assets**: This section is currently empty.
- PCLoud Processing - Edit, Scan, Download Files**: This section contains a list of filenames, including 'CUSTOM FILENAME', 'chars_lex', 'chars_plu', 'chars_trisha', 'ep025seq01sh01', 'ep025seq01sh02', 'ep025seq01sh03', 'props_candies_001', 'sets_home_085', 'sets_home_090', and 'sets_home_ext_008'. There is an 'Update Filenames' button next to the list.
- Publinks**: This section contains a list of public links, including 'https://u.pcloud.link/publink/show?code=' and 'https://u.pcloud.link/publink/show?code='.

A callout box with the following text is overlaid on the interface:

To edit or manually add a file name:

1. **Double-click** selected Asset row of full listing and input new file name
2. **Click Update Filenames** & new name will be added

Add or edit a filename by double-clicking asset & manually input new name. Click Update Filename & new name will be added.

PCLLOUD SCANNING

The screenshot shows the 'PCLLOUD SCANNING' interface with three main sections: 'Project Setup - Configure Directory for Project Mapping', 'Asset Selection - Load CSV and Select Assets', and 'PCLoud Processing - Edit, Scan, Download Files'. The 'Asset Selection' section contains a table with columns 'ShotCode', 'Duration', and 'Assets'. The 'PCLoud Processing' section contains a 'Publinks' table and a 'FileNames' list. Annotations explain the color coding of the 'FileNames' list and the steps for scanning and downloading files.

File Selection & File Details Viewing:

- **Double-click** filename to view matches in popup file details window
- Default will select only most recent version of file when multiple files exist

With Publinks and filenames ready:

- Click **Scan** button to search Publinks for selected files
- Results will be returned as color coding.

FileNames Legend:

- **Green** rows mean file is ready to download
- **Yellow** rows mean multiple files found...{ }
- **Red** rows mean file is not found in Publinks
- Hover over filename to see color reason

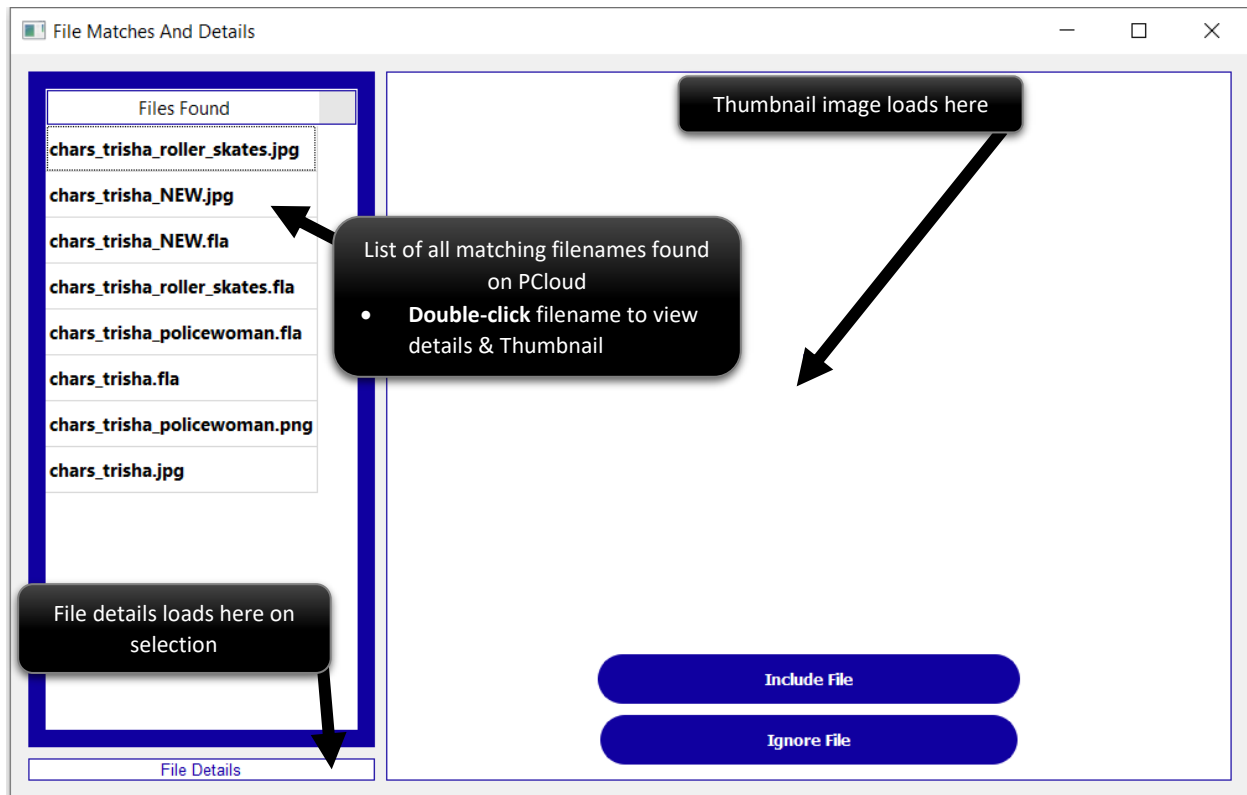

FileNames List:

FileNames
CUSTOM_FILENAME
chars_lex
chars_plu
chars_trisha
ep025seq01sh01
ep025seq01sh02
ep025seq01sh03
props_candies_001
sets_home_005
sets_home_010
sets_home_ext_008

Buttons: Update FileNames, Scan Linked Repos, Download Scanned Files, Cancel Download, Add Link, Back, Continue.

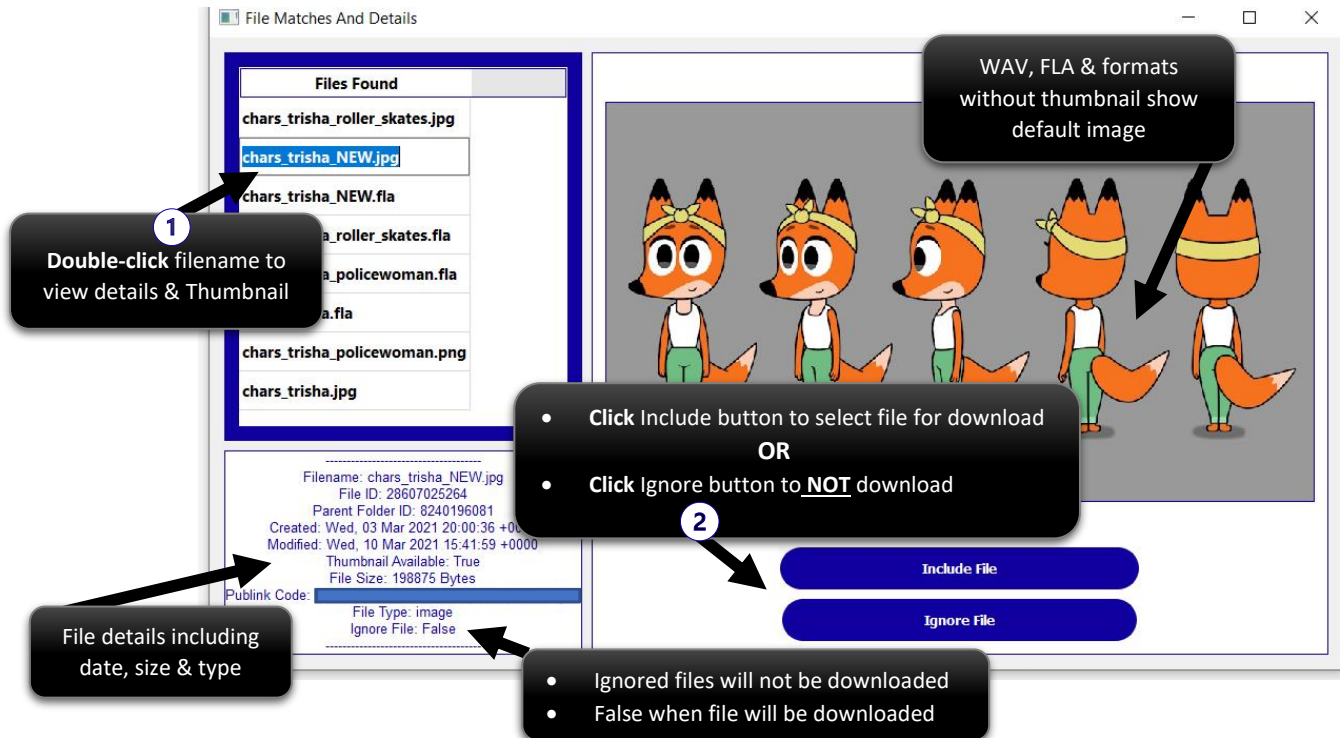

Once all publinks are added & filenames are configured, click Scan Linked Repo button to search for assets on pCloud. Results are returned as color coding of filenames. Hover over filename to see reasoning for color. Double-click a filename from filename list to view matches in file details popup window. This can be done for all filenames in list. Default will select only most recent version for download.

PCLLOUD MATCHES

List of matching filenames found on PCloud displayed on left table. Double-click a filename to view details, including thumbnail. File details are displayed on bottom left & thumbnail will display in center.

SELECTING FILES FOR DOWNLOADING

Upon file selection, thumbnail & file details are displayed. To select a file for download, click Include button. This will change Ignore File status to False. To NOT download file, click Ignore button to change Ignore File status to True. Default is to include all files so must manually ignore each ignorable file. Close window on completion.

DOWNLOADING FILES

Project Setup - Configure Directory for Project Mapping | Asset Selection - Load CSV and Select Assets | PCloud Processing - Edit, Scan, Download Files

ShotCode	Duration	Assets
ep025seq01sh01	61	sets_home_ext_008, CUSTOM_FILENAME
ep025seq01sh02	74	chars_trisha, sets_home_090
ep025seq01sh03	85	chars_lex, chars_plu, props_candies_001, sets_home_085
